

PLAY PRO K product description

PLAY HARDWOOD K – luxury in your hands

With the **PLAY HARDWOOD K**, we do welcome a very special **new member to the PLAY PRO K family**.

The PLAY HARDWOOD K was originally **designed and built in close teamwork** between Kendama **experts and institutions worldwide** to become **a competition Kendama** for the **world's best Players**.

But as result by the use of two different **noble wood** types - **beech and walnut** - the PLAY HARDWOOD K gained new qualities. Being **slightly heavier** than the standard models, the Player will **experience more direct control to the movements** which helps not only for **spacewalk** variations, but also for **balance and stilt tricks**.

No matter if you want to **reach new skill levels** or if you just want to **hold a piece of luxury in your hands**, the PLAY HARDWOOD K will be your choice!

Facts:
